EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald Daley on April 14, 2004.

The application has been amended as follows:

In claim 1 line 12, delete "which is" and insert - - being - -

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a method for patterning printed circuit boards having coarse conductor structures and having at least one region with fine conductor structures, comprising:

applying a metal layer to an electrically insulating substrate;

applying an etch resist layer to the metal layer;

exposing contours of envisaged coarse conductor structures, by partially eroding the etch resist layer with a first laser beam with a predefined first wavelength and a first processing field size;

exposing contours of the fine conductor structures, by partially eroding the etch resist layer with a second laser beam with a predefined second wavelength and a second processing field size, at least one of the second wavelength being relatively shorter than the first wavelength and the second field size being relatively smaller than the first field size;

producing the coarse and the fine conductor structures simultaneously by etching the exposed metal regions, and

exposing the surfaces of the conductor structures by eroding the remainder of the etch resist layer, as in the context of claim 1.

The closest prior art, Heerman (US 6,576,402 B2), discloses to use photolithography to form coarse structures, but does not suggest to use a second wavelength shorter than the first wavelength or a second field size smaller than the first field size for exposing fine and coarse structures, as in the context of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
